## **DETAILED ACTION**

### ***Claim Objections***

Claims 7-21 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependant claim. See MPEP § 608.01(n). Accordingly, claims 7-21 have not been further treated on the merits in comparing the claims to the prior art.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 14-18 provides for the use of zeolite seeds, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 1755

Claims 14-18 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Elliott, Jr. (US Patent No. 4,164,551).

Elliott, Jr. discloses a method of making a zeolite in which a zeolite suspension is separated from its mother liquor by filtration, and subsequently washed. See col. 2, lines 10-25. The zeolite product obtained at this part in the process of Elliott, Jr. corresponds to the large particle fraction referred to in the present claims.

The mother liquor and wash water contains finely divided particles of a zeolite. Id. The finely divided zeolite product contained in the mother liquor/wash water corresponds to the smaller particle size referred to in the present claims.

Art Unit: 1755

The reference differs from the present claims by failing to disclose that the finely divided portion of zeolite is "suitable for use as seed crystals." However, the finely divided product of Elliott, Jr. is formed in a manner identical to the instant process. Since, the fine zeolite product of the portion is formed in a manner identical to the present claims, it is assumed that the fine zeolite of the reference is "suitable for use as seed crystals." See MPEP 2112.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
